Foundations Of Our Training / Services

ITDG training and services are based off of our Real World Experience (**10+ Years**) helping the U.S Government (DoD, IC) and businesses develop robust and effective ITP's, using a proven, comprehensive and methodical ITM Framework. The ITDG provides our clients with the *Gold Standard* for successful ITM, that will update an organization to a Security 2.0 Framework, to detect and mitigate employees who may pose a threat to the organization.

A primary centerpiece of our training and services is that we incorporate *Lessons Learned* based on our analysis of ITP's, and Insider Threat related incidents encountered from working with our clients, and from collaboration with an extensive network of ITP Managers / Security Professionals.

We were one of the first companies to offer comprehensive ITP Development & Management Training to the U.S. Government and defense contractors, who were required to implement ITP's, based off National Insider Threat Policy, and NISPOM Conforming Change 2 regulations.

A robust and effective ITP is built on top of a solid foundation of security. Our training and services incorporate these foundations from other training courses we have developed and taught. In 2009 NSA awarded the ITDG a contract for an Information Systems Security Program / Insider Threat Training Course. This course was taught to 100 NSA Security Professionals (ISSM / ISSO), the DoD, Navy, National Nuclear Security Administration, Department of Energy National Labs, and to many other organizations.

All ITDG training courses are mapped to the National Cybersecurity Workforce Framework (NCWF). The NCWF is published by the National Institute of Standards and Technology (NIST). [NIST Special Publication 800-181: NICE Framework](#), is a nationally focused resource that establishes a taxonomy and common lexicon to describe Cybersecurity work. The NICE Framework is intended to be applied in the public, private, and academic sectors. Our ITM training courses *exceed* the requirements for ITM education in Cybersecurity Training. ITM requires more than just Cybersecurity or Technical knowledge to be effective.
